

Uses

- Automatic or semi-automatic transmissions and torque converters of all passenger cars, light commercial vehicles and industrial vehicles, when the manufacturer requires an ATF(Automatic Transmission Fluid) GM DEXRON III.
- Suitable for use all transmissions of trucks, buses and Public works machineries when a fluid type ALLISON C-4 is required.
- Hydraulic systems when a fluid type GM DEXRON III is required.

PROPERTIES

- Very high viscosity index linked with an excellent viscosity stability in operation
- Very low pour point
- Very good thermal stability
- Excellent resistance to oxidation

SPECIFICATION

- GM DEXRON III H-specification (H-36191)
- ALLISON C-4

CHARACTERISTICS

Test Items	Method	Unit	Typical Value
Specific Gravity 15/4 °C	ASTM D 1298	-	0.861
Viscosity 40 °C	ASTM D 445	mm ² /s	33.0
Viscosity 100 °C	ASTM D 445	mm ² /s	7.6
Viscosity Index	ASTM D 2270	-	208
Flash Point Cleveland	ASTM D 92	°C	183
Pour Point	ASTM D 97	°C	-46

Above characteristics are mean values given as an information.
